Education

National Institute of Technology Delhi, New Delhi

Expected: 2026

Bachelor of Technology in Electronics and Communication Engineering

Dhruva Public School, New Delhi

Graduated: 2022

Senior Secondary Education (XI-XII)

Experience

Web Development Intern, BELLBUCKET

June 2024 – August 2024

- Developed a responsive UI for the “Product Everyday” project, increasing user interaction by 30%.
- Implemented dynamic components using HTML, CSS, and JavaScript, reducing bounce rate by 20%.
- Collaborated with a team of 4 using Agile Scrum methodology, delivering weekly sprints with 95% on-time completion.
- Improved website load time by 40% through image optimization and efficient JavaScript practices.
- Utilized Git version control for codebase management across multiple feature branches.

Projects

Blockchain Voting System

GitHub

- Engineered a C++-based blockchain system to securely record and tally votes, ensuring 100% tamper-proof transaction integrity.
- Implemented a proof-of-work mechanism with a custom hash function, enhancing blockchain validation and integrity.
- Designed a system with 5 core functionalities: vote casting, blockchain validation, vote counting, chain visualization, and file-based persistence, processing 100+ votes in testing scenarios.
- Optimized input handling and file I/O operations, reducing runtime errors by 80%

Mini Git Version Control System

GitHub

- Engineered a Git-like version control system in Python supporting commit, branching, and checkout operations.
- Implemented content-addressable storage using SHA-1 hashing for efficient file tracking and storage.
- Designed a commit graph with parent linking to enable version history traversal and rollback functionality.
- Built a modular architecture with staging, commit management, and branch handling components.

Chatbot

GitHub

- Developed a Gemini-style chatbot UI in Flutter, handling context-aware functionality in conversations.
- Implemented context management to sustain conversation logic with 98% accuracy.
- Implemented Firebase Authentication to enable secure and reliable user login in the chatbot app.
- Boosted app performance by optimizing asynchronous operations and reducing UI rebuilds by 35%.

Skills

- **Programming Languages:** C, C++, Python
- **Concepts:** Problem Solving, Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems (OS), Database Management System (DBMS).
