SUMMARY

I am a seasoned Data Engineer with 4.5 years of experience supporting clients by transforming complex data into actionable insights. Alongside a strong technical background in machine learning and data analytics, I have successfully contributed to projects that enhance business efficiency. Passionate about continuous learning and community service, I thrive on challenges that enable me to leverage my skills effectively

EXPERIENCE

Senior Software Engineer (Product Development)

mFilterit (Six Dee Netad Solutions Pvt Ltd)

📅 03/2021 - Present

A company focused on product development in digital marketing ad fraud detection

- Working as a **Senior Software Engineer & Data Engineer** on a large-scale **Web Fraud Detection Platform**, building robust data pipelines and integrating **statistical and machine learning techniques** to support real-time fraud identification.
- Designing, developing, and maintaining **AWS Lambda** to automate data ingestion, transformation, and orchestration within the fraud detection pipeline.
- Creating and optimizing **AWS Athena** table schemas for querying structured and semi-structured data at scale, supporting downstream **ML model training**, analytics, and dashboarding.
- Managing and processing high-volume **VAST (Video Ad Serving Tag)** data for in-depth fraud analysis, using tools such as **PySpark**, **Pandas**, and **SQL** for feature extraction and model-ready data preparation.
- Contributing to the development and deployment of **fraud detection rules**, leveraging large datasets and applying **feature engineering**, **correlation analysis**, and **machine learning models** to enhance prediction accuracy.
- Ensuring **data quality, reliability, and performance** across the system through continuous **bug fixes**, performance tuning, and scalable pipeline architecture..
- Collaborating cross-functionally with stakeholders including **Intel and other national clients** to understand data requirements, translate business problems into engineering solutions, and deliver **ML-integrated, data-driven insights**.

Executive - Data Analyst

Affle India Ltd

📅 01/2020 - 03/2021

A mobile marketing company specializing in driving growth for businesses

- Working On Fraud Risk Analysis on Affiliate Marketing (Amazon, Unacademy, Voot, Swiggy etc) as many as other Campaigns in (SEA, INTEL, INDIA) Regions.
- Working On Cost Analysis i.e How to Reduce the cost Of the Company with their Partners.
- Help the Team (SEA, INTEL, INDIA) Regions to detect the Fraud Trends with the help of Correlations between the Fields in heavy Data Sets.
- Help the Channels to reduce the Fraud.
- Designing and maintaining **interactive dashboards** using **Tableau and Excel**, providing clear visualizations and real-time reporting to help stakeholders monitor campaign performance and detect unusual behavior patterns.

EDUCATION

PGP (DSE)

Great Lakes Institute of Management

📅 07/2019 - 07/2019

B. Tech (M.E)

Krishna Engineering College, AKTU

📅 08/2014 - 06/2018

12th Std

G.D Public School Aligarh

📅 01/2014 - 03/2014

10th Std

G.D Public School Aligarh

📅 01/2012 - 03/2012

STRENGTHS

- Team Development
- Providing training and support to new team members

KEY ACHIEVEMENTS

- MAVERICK Award
- Awarded as MAVERICK for automating daily tasks by mFilterit
- Kaggle Competitions
- Participated and contributed solutions in multiple Kaggle competitions, including House Price Prediction and Walmart Sales Prediction

SKILLS

Athena	AWS	AWS Lambda	EDA
Power Bi	SQL	Numpy	Pandas
PySpark	Python	Clickhouse	S3
Scikit-Learn	Excel	Tableau	

PROJECTS

Hospital Readmission Prediction

Diabetes Patient's Hospital Readmission project focused on predicting readmission risks

- Developed a predictive model to identify hospital readmission risks for diabetic patients
- Analyzed univariate and multivariate relationships in medical data
- Utilized SMOTE for balancing highly imbalanced data

House Prices Prediction

House Prices project aimed at predicting sale prices of residential properties

- Applied regression techniques to predict house sale prices from 79 variables
- Handled missing values and standardized data using Grid Search CV

Walmart Sales Prediction

Walmart Sales Prediction project to enable retail sales forecasting

- Forecasted sales for various Walmart product categories based on historical sales data
- Determined key influences on sales for business performance estimation
