 [Bold Profile](#)

PROFESSIONAL SUMMARY

Accomplished Lead Data Engineer at IH ANALYTICS SOFTWARE PVT LTD, specializing in data pipeline design and ETL development. Proven track record in optimizing cloud data architectures on AWS and Databrick and enhancing data integrity. Strong collaborator with excellent problem-solving skills, driving impactful data solutions that empower analytics and reporting initiatives.

SKILLS

Data pipeline design
ETL development
Spark development
Python programming
SQL programming
Databrick
AWS services

EDUCATION

Krishna Engineering College
Ghaziabad, India • 07/2013 - 07/2017

Bachelor of Technology: Computer Science

CERTIFICATIONS

03/2025
Databricks Certified Data Engineer Professional

09/2022
Amazon Web Services DevOps Engineer - Professional

WORK HISTORY

IH ANALYTICS SOFTWARE PVT LTD - Lead Data Engineer
Delhi, India • 08/2022 - Current

- Data Architecture & Engineering Design, develop, and optimize data pipelines for ETL (Extract, Transform, Load) and ELT processes. Architect and implement data warehousing solutions using platforms like AWS, Snowflake, Databricks. Design scalable, distributed data processing systems using Apache Spark, Hadoop, or similar frameworks.
- Data Modeling & Storage Develop and maintain logical and physical data models to support analytics, reporting, and ML use cases. Optimize database performance and implement indexing, partitioning, and caching strategies. Work with structured (SQL) and unstructured (NoSQL, MongoDB, Cassandra, etc.) databases.
- Data Pipeline & Workflow Automation Build real-time and batch data pipelines using tools like Apache Kafka, AWS Glue. Ensure data quality, validation, and governance by implementing data integrity checks. Automate data ingestion and transformation processes to improve reliability and scalability.
- Cloud & Infrastructure Management Deploy data pipelines on cloud platforms like AWS. Implement CI/CD pipelines for automated deployment of data pipelines. Optimize cost and performance of cloud-based data architectures.
- Security, Compliance, & Governance Implement data security and compliance policies (GDPR, CCPA, HIPAA) to protect sensitive data. Ensure role-based access control (RBAC) and encryption mechanisms for secure data management. Work with data cataloging and lineage tracking tools for governance.
- Collaboration & Stakeholder Communication Work closely with Data Scientists, Analysts, and Business Teams to support data-driven decision-making. Provide guidance on data best practices, performance tuning, and data-driven solutions. Mentor and train junior data engineers and contribute to team growth.

Accenture - Application Development Analyst
Gurgaon, India • 06/2021 - 08/2022

- Have been the part of team of Adobe Sign Engineering , A cloud-based e-signature service that allows to send, sign, track, and manage signature processes using a browser or mobile device. It is a part of the Adobe Document Cloud suite of services.
- Collaborated with cross-functional teams to deliver high-quality software applications on time and within budget.
- Enhanced application functionality by identifying areas for improvement and implementing modifications.
- Reduced application errors by conducting thorough testing procedures and promptly addressing issues.
- Improved code quality by adhering to best practices and enforcing coding standards across the team.

Infosys Technologies - System Engineer

Gurgaon, India • 06/2018 - 04/2021

- Have been part of development team of Insurance Product McCamish for client India-Post on a life insurance administration solution which includes a customer facing Website, a backend system for handling business logic and some workflow for the Insurance like after Death , Maturity , Survival for the end users . Some of technologies which were used in this solution were Java, Spring, hibernate, JSP, HTML,SQL, JavaScript, Rest web-services.
- Responsibilities:
- Application Development and Unit Testing of critical modules like Death Claim, New business Fulfillment, Lead Process Management, etc.
- Technical production analysis on issues related to core business logic and fixes them , aiming towards defect free delivery
- Verification and implementation of Web-Service like REST API.
- Implemented new requirement by client in the application as per the SRS .
- Prepare scripts for new enhancement and functionalities introduced in project.
- Worked on integration testing of two module after implementing new changes.
